VOLUME CONTENTS

January

E. R. G. Eckert	1	In Memoriam—Professor Takashi Sato
K. Suzuki	3	In Memoriam—Professor Takashi Sato
S. Sugawara, T. Sato, H. Komatsu and H. Osaka	5	Effect of free stream turbulence on flat plate heat transfer
M. F. Taylor, K. E. Bauer and D. M. McEligot	13	Internal forced convection to low-Prandtl-number gas mixtures
B. D. Young and B. M. van Vliet	27	The effect of surface roughness on fluid-to-particle mass transfer in a packed adsorber bed
C. Beckermann and R. Viskanta	35	Natural convection solid/liquid phase change in porous media
A. R. Figueiredo and D. X. Viegas	47	External forced convection around a circular cylinder near a plane boundary
T. A. Grimley, I. Mudawwar and F. P. Incropera	55	CHF enhancement in flowing fluorocarbon liquid films using structured surfaces and flow deflectors
J. A. Shmerler and I. Mudawwar	67	Local heat transfer coefficient in wavy free-falling turbulent liquid films undergoing uniform sensible heating
C. Doughty and K. Pruess	79	A semianalytical solution for heat-pipe effects near high-level nuclear waste packages buried in partially saturated geological media
T.-Y. Wang and C. Kleinstreuer	91	Combined free–forced convection heat transfer between vertical slender cylinders and power-law fluids
R. Festa, O. Manca and V. Naso	99	A comparison between models of thermal fields in laser and electron beam surface processing
G. E. Karniadakis	107	Numerical simulation of forced convection heat transfer from a cylinder in crossflow
A. F. G. Jacobs and D. Welgraven	119	A simple model to calculate the Sherwood and Nusselt numbers for discs of various shapes
H. Tanaka	129	On the stability of vapor film in pool film boiling
M. Fujii, Y. Seshimo and G. Yamanaka	135	Heat transfer and pressure drop of perforated surface heat exchanger with passage enlargement and contraction

G. S. H. Lock and R. D. Abdurahman — 143 — Heat transfer characteristics of the closed tube aero-syphon

P. Paranthoen, A. Fouari, A. Dupont and J. C. Lecordier — 153 — Dispersion measurements in turbulent flows (boundary layer and plane jet)

C. Bos — 167 — A sublayer description for the air friction acting on thin filaments during melt spinning

D. Gazit — 177 — Natural heat transfer in a mercury bath and the effect of introduced partitions

J. C. Han and J. S. Park — 183 — Developing heat transfer in rectangular channels with rib turbulators

Technical Notes

S. Kimura — 197 — Forced convection heat transfer about an elliptic cylinder in a saturated porous medium

I.-S. Park and B. J. McCoy — 200 — Approximate analytical solution for non-convective heat or mass transfer in composites of spherical particles

M. A. Ebadian, H. C. Topakoglu and O. A. Arnas — 204 — The effect of heat generation on convective heat transfer for laminar flows in a multi-passage circular pipe maintained under constant wall temperature

N. S. Grewal, M. Kestoras, V. K. Nangia and B. S. Rao — 207 — Total normal emittance of dolomitic limestone

Book Review

D. B. Spalding — 211 — Combustion Flames and Explosions of Gases, by Bernard Lewis and Guenther von Elbe

Announcement

213 — Modelling of Multiphase Systems for Industrial Applications, Swiss Federal Institute of Technology (ETH), Zurich, Switzerland, 14–18 March 1988

February

PROFESSOR YASUO MORI—A FESTSCHRIFT ISSUE

K. Hijikata, R. Echigo and I. Tanasawa — 215 — Professor Yasuo Mori on the occasion of his 65th birthday

E. R. G. Eckert and J. P. Hartnett — 217 — Professor Yasuo Mori on his 65th birthday

Y. Katto and S. Yokoya — 219 — Critical heat flux on a disk heater cooled by a circular jet of saturated liquid impinging at the center

Y. Fujita, H. Ohta, S. Uchida and K. Nishikawa — 229 — Nucleate boiling heat transfer and critical heat flux in narrow space between rectangular surfaces

D. S. Herbein and W. M. Rohsenow — 241 — Comparison of entropy generation and conventional method of optimizing a gas turbine regenerator

F. Ogino, S. Kanzaki and T. Mizushina — 245 — Condensation of binary vapors of immiscible liquids

B.-X. Wang and Z.-H. Fang — 251 — Water absorption and measurement of the mass diffusivity in porous media

H. Suzuki, K. Suzuki and T. Sato	259	Dissimilarity between heat and momentum transfer in a turbulent boundary layer disturbed by a cylinder
O. G. Martynenko, N. V. Pavlyukevich, G. S. Romanov, R. I. Soloukhin and S. I. Shabunya	267	Radiative heating of a fine-porous filled material
A. Castrejon and D. B. Spalding	273	An experimental and theoretical study of transient free-convection flow between horizontal concentric cylinders
T. Maekawa and I. Tanasawa	285	Effect of magnetic field on onset of Marangoni convection
J. Gosse	295	Conductivité thermique d'un liquide saturé polyatomique et non polaire
M. L. Hunt and C. L. Tien	301	Effects of thermal dispersion on forced convection in fibrous media
Y. Yoshizawa, K. Sasaki and R. Echigo	311	Analytical study of the structure of radiation controlled flame
S. Chellaiah and R. Viskanta	321	Freezing of saturated and superheated liquid in porous media
R. A. Brewster and B. Gebhart	331	An experimental study of natural convection effects on downward freezing of pure water
Y. Kurosaki, H. Ishiguro and K. Takahashi	349	Fluidization and heat-transfer characteristics around a horizontal heated circular cylinder immersed in a gas fluidized bed
N. Himeno, K. Hijikata and A. Sekikawa	359	Latent heat thermal energy storage of a binary mixture—flow and heat transfer characteristics in a horizontal cylinder
M. Hirano, T. Miyauchi and Y. Takahira	367	Enhancement of radiative heat transfer in the laminar channel flow of non-gray gases
Y.-J. Su, W.-J. Yang and G. Kawashima	375	Natural convection in evaporating sessile drops with solidification
K. Futagami and Y. Aoyama	387	Laminar heat transfer in a helically coiled tube
K. Ohtake and K. Okazaki	397	Optical CT measurement and mathematical prediction of multi-temperature in pulverized coal combustion field
A. Yabe and H. Maki	407	Augmentation of convective and boiling heat transfer by applying an electro-hydrodynamical liquid jet
U. S. Gill and W. J. Minkowycz	419	Boundary and inertia effects on conjugate mixed convection heat transfer from a vertical plate fin in a high-porosity porous medium

Y. YAMADA 429 Combined radiation and free convection heat transfer in a vertical channel with arbitrary wall emissivities

M. L. NG and J. P. HARTNETT 441 Free convection heat transfer from horizontal wires to pseudoplastic fluids

W. NAKAYAMA, H. KUWAHARA and S. HIRASAWA 449 Heat transfer from tube banks to air/water mist flow

March

G. A. NUNEZ and E. M. SPARROW 461 Models and solutions for isothermal and non-isothermal evaporation from a partially filled tube

L. M. ZYSINA-MOLOZHEN, L. S. PETUKHOV and A. A. MALKOV 479 Thermal boundary layer development in transonic and/or separated turbulent flows past surfaces

R. PASQUETTI et D. PETIT 487 Analyse modale d'un processus de diffusion thermique: identification par thermographie infra-rouge

P. V. TSOI 497 A method for calculating direct and inverse problems of unsteady-state heat transfer

J. V. BECK and B. LITKOUHI 505 Heat conduction numbering system for basic geometries

V. G. RIFERT 517 Heat transfer and flow modes of phases in laminar film vapour condensation inside a horizontal tube

M. MAGEN, D. PNUELI and Y. ZVIRIN 525 The stability chart of parallel shear flows with double diffusive processes—approximate derivation by a first-order Galerkin method

V. V. KLIMENKO 541 A generalized correlation for two-phase forced flow heat transfer

A. DEGIOVANNI 553 Conduction dans un "mur" multicouche avec sources: extension de la notion de quadripole

M. AL-ARABI and B. SAKR 559 Natural convection heat transfer from inclined isothermal plates

F. XAVIER MALCATA 567 Double surface-renewal model for the prediction of mass transfer rates during bubble formation with instantaneous reaction on the liquid side

N. ACHARA, M. E. HORSLEY, M. R. I. PURVIS and R. H. TEAGUE 577 Zonal heat transfer rates in a fluidized bed combustor

O. TERHMINA et A. MOJTABI 583 Ecoulements de convection forcée en régimes dynamique et thermique non établis dans un espace annulaire

M. ABBAS and V. P. TYAGI 591 On the mass transfer in a circular conduit dialyzer when ultrafiltration is coupled with dialysis

G. D. Mazza and G. F. Barreto 603 The gas contribution to heat transfer between fluidized beds of large particles and immersed surfaces

T.-C. A. Chang, D. R. Jeng and K. J. DeWitt 615 Natural convection to power-law fluids from two-dimensional or axisymmetric bodies of arbitrary contour

R. M. Manglik and A. E. Bergles 625 Laminar flow heat transfer in a semi-circular tube with uniform wall temperature

W. Y. D. Yuen 637 Heat conduction in sliding solids

L. S. Yao 647 A weak collision of two natural-convection boundary layers

Technical Notes

O. A. Arnas and M. A. Ebadian 657 Convective heat transfer for steady laminar flow between two confocal elliptic pipes with longitudinal uniform wall temperature gradient and uniform heat generation

D. G. Neilson and F. P. Incropera 660 Local heat transfer from a horizontal cylinder in unstratified and salt-stratified fluid layers

K.-A. Park and A. E. Bergles 664 Ultrasonic enhancement of saturated and subcooled pool boiling

Announcements

669 Near Wall Turbulence, ICHMT International Seminar, Dubrovnik, Yugoslavia, 16–20 May 1988

669 POLYMODEL XI, Flow Modelling in Industrial Processes, Teesside Polytechnic, 24–25 May 1988

669 Heat Transfer in Electronic and Microelectronic Equipment, 20th ICHMT International Symposium, Libertas Hotel, Dubrovnik, Yugoslavia, 29 August–2 September 1988

671 Erratum

April

J. Ettefagh and K. Vafai 673 Natural convection in open-ended cavities with a porous obstructing medium

Y. F. Rao, K. Fukuda and S. Hasegawa 695 A numerical study of three-dimensional natural convection in a horizontal porous annulus with Galerkin method

M. Sen, D. A. Pruzan and K. E. Torrance 709 Analytical and experimental study of steady-state convection in a double-loop thermosyphon

R. A. Antonia, L. V. Krishnamoorthy and L. Fulachier 723 Correlation between the longitudinal velocity fluctuation and temperature fluctuation in the near-wall region of a turbulent boundary layer

J. A. Shmerler and I. Mudawwar 731 Local evaporative heat transfer coefficient in turbulent free-falling liquid films

Y. Joshi and B. Gebhart 743 Transient response of a steady vertical flow subject to a change in surface heating rate

J.-Y. JANG and W.-J. CHANG 759 Vortex instability of buoyancy-induced inclined boundary layer flow in a saturated porous medium

J.-Y. JANG and W.-J. CHANG 769 The flow and vortex instability of horizontal natural convection in a porous medium resulting from combined heat and mass buoyancy effects

N. N. SMIRNOV 779 Combustion and detonation in multi-phase media. Initiation of detonation in dispersed-film systems behind a shock wave

CHR. B. BOYADJIEV and N. L. VULCHANOV 795 Non-linear mass transfer in boundary layers—1. Asymptotic theory

N. L. VULCHANOV and CHR. B. BOYADJIEV 801 Non-linear mass transfer in boundary layers—2. Numerical investigation

E. V. DUBROVSKY and V. YA. VASILIEV 807 Enhancement of convective heat transfer in rectangular ducts of interrupted surfaces

J. Y. ZHU, R. M. C. SO and M. V. OTUGEN 819 Turbulent mass flux measurements using a laser/hot-wire technique

T. FUJII, S. KOYAMA and N. S. BUENCONSEJO, JR. 831 Laminar free convection flow rate in a vertical tube

M. L. HUBER and M. C. JONES 843 A frequency response study of packed bed heat transfer at elevated temperatures

S. K. DUTTA, V. K. NEMA and R. K. BHARDWAJ 855 Drying behaviour of spherical grains

D. R. DUDEK, T. H. FLETCHER, J. P. LONGWELL and A. F. SAROFIM 863 Natural convection induced drag forces on spheres at low Grashof numbers: comparison of theory with experiment

V. K. GARG and S. JAYARAJ 875 Thermophoresis of aerosol particles in laminar flow over inclined plates

Technical Notes

A. FAGHRI and R. A. SEBAN 891 Heat and mass transfer to a turbulent liquid film

B. N. ANTAR 895 Penetrative double diffusive convection: effects of the Lewis and Prandtl numbers

S. OLEK, Y. ZVIRIN and E. ELIAS 898 The relation between the rewetting temperature and the liquid–solid contact angle

Announcement

903 Fourth International Topical Meeting on Nuclear Reactor Thermal Hydraulics, Kongreßzentrum, Karlsruhe, F.R.G., 10–13 October 1989

May

W. J. MINKOWYCZ, K. E. TORRANCE, J. R. LLOYD, J. P. HARTNETT, T. S. CHEN and A. HAJI-SHEIKH 905 Professor Ephraim M. Sparrow on his 60th birthday

E. M. Sparrow, R. Ruiz and L. F. A. Azevedo	907	Experimental and numerical investigation of natural convection in convergent vertical channels
Ming-I Char and Cha'o-Kuang Chen	917	Temperature field in non-Newtonian flow over a stretching plate with variable heat flux
N. E. Zaritzky and A. E. Bevilacqua	923	Oxygen diffusion in meat tissues
K. S. Chen and Y. R. Chang	931	Steady-state analysis of two-phase natural circulation loop
A. F. Trial and F. J. Spera	941	Natural convection boundary layer flows in isothermal ternary systems: role of diffusive coupling
S. B. Nasrallah and P. Perre	957	Detailed study of a model of heat and mass transfer during convective drying of porous media
J. Sun and M. M. Chen	969	A theoretical analysis of heat transfer due to particle impact
N. Pazooki and S. K. Loyalka	977	Heat transfer in a rarefied polyatomic gas—II. Sphere
A. F. Polyakov and S. A. Shindin	987	Development of turbulent heat transfer over the length of vertical tubes in the presence of mixed air convection
J.-Y. Jang and W.-L. Tsai	993	Thermal instability of two horizontal porous layers with a conductive partition
B.-X. Wang and W.-P. Yu	1005	A method for evaluation of heat and mass transport properties of moist porous media
A. P. Silva-Freire	1011	An asymptotic solution for transpired incompressible turbulent boundary layers
T. H. Lin, C. K. Law and S. H. Chung	1023	Theory of laminar flame propagation in off-stoichiometric dilute sprays
G. Desrayaud and G. Lauriat	1035	Radiative influence on the stability of fluids enclosed in vertical cavities
F.-C. Lai, V. Prasad and F. A. Kulacki	1049	Aiding and opposing mixed convection in a vertical porous layer with a finite wall heat source
S. J. Chen and A. Y. Tong	1063	Application of elliptic grid generation technique to the solution of hydrodynamics and heat transfer of droplet arrays at intermediate Reynolds numbers
J. Gembarovič and V. Majerník	1073	Non-Fourier propagation of heat pulses in finite medium
J. G. Georgiadis and I. Catton	1081	Dispersion in cellular thermal convection in porous layers
T. F. Lin and J. C. Kuo	1093	Transient conjugated heat transfer in fully developed laminar pipe flows

D. E. Prapas, B. Norton and S. D. Probert 1103 Thermal resistance of a solar-energy collector absorber under a non-uniform flux distribution

Y. Utaka, A. Saito and H. Yanagida 1113 On the mechanism determining the transition mode from dropwise to film condensation

Announcements

1121 International Conference on Energy Sources Management and Energy Saving Technology, Beijing, People's Republic of China, 20–23 September 1988

1121 1988 International Conference on Heat Transfer in Energy Conservation, Shenyang, People's Republic of China, 6–9 October 1988

1122 Conference on Optical Methods in Flow and Particle Diagnostics, International Congress on Applications of Lasers and Electro-optics, Santa Clara, California, U.S.A., 30 October–4 November 1988

1122 Second International Symposium on Multi-phase Flow and Heat Transfer, Xi'an, China, 21–24 June 1989

1122 International Symposium on Turbulence Modification in Dispersed Multiphase Flows, ASME Spring Annual Meeting, San Diego, California, U.S.A., 9–12 July 1989

June

M. A. Styrikovich, V. E. Nakoryakov, A. I. Leontiev, A. A. Zhukauskas, A. A. Dolinsky and O. G. Martynenko 1125 In Memoriam—Professor R. I. Soloukhin (1930–1988)

S. R. Yang and R. H. Kim 1127 A mathematical model of the pool boiling nucleation site density in terms of the surface characteristics

R. Kumar 1137 Study of natural convection in horizontal annuli

P. M. Kolesnikov and V. I. Bubnovich 1149 Non-stationary conjugate free-convective heat transfer in horizontal cylindrical coaxial channels

W. S. Fu and R. M. Wu 1157 Heat transfer from an isothermal wedge in an air–water mist flow

M. De Paz and G. Sonnino 1167 General theory of a convective nucleus of a fluid in unsteady state and in non-linear conditions

P. Hillion 1173 Remark on the solutions of the diffusion equation

K. S. Chang, C. J. Choi and C. H. Cho 1177 Laminar natural convection heat transfer from sharp-edged horizontal bars with flow separation

S. T. Wang and R. A. Seban 1189 Heat transfer during the quench process that occurs in the reflood of a single vertical tube

T. C. Hoang and R. A. Seban 1199 The heating of a turbulent water jet discharged vertically into a steam environment

A. Bejan 1211 Theory of heat transfer-irreversible power plants

P. JANY and A. BEJAN 1221 Scaling theory of melting with natural convection in an enclosure

Y. ASAKO, H. NAKAMURA and M. FAGHRI 1237 Heat transfer and pressure drop characteristics in a corrugated duct with rounded corners

F. C. LAI and F. A. KULACKI 1247 Natural convection across a vertical layered porous cavity

K. H. TOH and A. J. GHAJAR 1261 Heat transfer in the thermal entrance region for viscoelastic fluids in turbulent pipe flows

A. R. KHAN, N. S. BAKER and A. P. WARDLE 1269 The dynamic characteristics of a countercurrent plate heat exchanger

Y. H. HUNG and W. M. SHIAU 1279 Local steady-state natural convection heat transfer in vertical parallel plates with a two-dimensional rectangular rib

B. POULSON and R. ROBINSON 1289 The local enhancement of mass transfer at 180° bends

F. C. CHOU and G. J. HWANG 1299 Numerical analysis of the Graetz problem with natural convection in a uniformly heated horizontal tube

G. A. GREENE, J. C. CHEN and M. T. CONLIN 1309 Onset of entrainment between immiscible liquid layers due to rising gas bubbles

Technical Notes

Y. SEZEN 1319 A method for determination of chemical rate mostly encountered in coal combustion processes

R. O. WARRINGTON, S. SMITH, R. E. POWE and R. L. MUSSULMAN 1322 Boundary effects on natural convection heat transfer for cylinders and cubes

R. KARVINEN 1326 Transient conjugated heat transfer to laminar flow in a tube or channel

Announcement

1329 Eleventh International Conference on the Properties of Steam, Prague, Czechoslovakia, 4–8 September 1989

July

R. I. SOLOUKHIN†, O. G. MARTYNENKO, O. A. GERASHCHENKO, A. I. LEONTIEV, YU. A. MIKHAILOV, I. L. MOSTINSKY, R. I. NIGMATULIN, M. A. STYRIKOVICH and A. A. ZUKAUSKAS 1331 Alexandr Adolfovich Gukhman on his 90th birthday

I. TANASAWA and R. ECHIGO 1335 Heat transfer bibliography—Japanese works

E. M. SPARROW and G. A. NUNEZ 1345 Experiments on isothermal and non-isothermal evaporation from partially filled, open-topped vertical tubes

M. H. KIM and M.-U. KIM 1357 Natural convection near a rectangular corner

H. Inaba, M. Sugawara and J. Blumenberg	1365	Natural convection heat transfer in an inclined porous layer
C. L. Saluja, B. L. Button and B. N. Dobbins	1375	Full-field *in situ* measurement of local mass transfer coefficient using ESPI with the swollen polymer technique
S. L. Lee, T. S. Chen and B. F. Armaly	1385	Non-parallel wave instability of mixed convection flow on inclined flat plates
K. J. Renken and D. Poulikakos	1399	Experiment and analysis of forced convective heat transport in a packed bed of spheres
Y. F. Hsu and B. Rubinsky	1409	Two-dimensional heat transfer study on the keyhole plasma arc welding process
S. Shakerin, M. Bohn and R. I. Loehrke	1423	Natural convection in an enclosure with discrete roughness elements on a vertical heated wall
D. R. Atthey	1431	An approximate thermal analysis for a regenerative heat exchanger
M. Maracy and R. H. S. Winterton	1443	Hysteresis and contact angle effects in transition pool boiling of water
H. F. Bauer	1451	Mass transport in sector and annular sector tubes
G. Wu, M. Fiebig and A. Leipertz	1471	Thermal diffusivity of transparent liquids by photon correlation spectroscopy—II. Measurements in binary mixtures with a small difference in the refractive index of both pure components
N. Selçuk	1477	Evaluation of flux models for radiative transfer in rectangular furnaces
H. C. Ünal	1483	The effect of the boundary condition at a fin tip on the performance of the fin with and without internal heat generation
A. Moros and J. C. R. Hunt	1497	Recirculating flows in the cross-section of a channel induction furnace
L. S. Shen and J. W. Ramsey	1517	An investigation of transient, two-dimensional coupled heat and moisture flow in the soil surrounding a basement wall

Technical Notes

C. VIVÈS	2047	Effects of a forced Couette flow during the controlled solidification of a pure metal
A. A. MOSTAFA and H. C. MONGIA	2063	On the interaction of particles and turbulent fluid flow
C. BECKERMANN and R. VISKANTA	2077	Double-diffusive convection due to melting
C. UNAL, K. TUZLA, J. C. CHEN, S. NETI and O. BADR	2091	Convective film boiling in a rod bundle: axial variation of nonequilibrium evaporation rates
T. TSUJI and Y. NAGANO	2101	Turbulence measurements in a natural convection boundary layer along a vertical flat plate
C. J. HO and Y. H. LIN	2113	Laminar natural convection of cold water enclosed in a horizontal annulus with mixed boundary conditions
H. Q. YANG, K. T. YANG and J. R. LLOYD	2123	Natural convection suppression in horizontal annuli by azimuthal baffles
T. D. YUAN, J. A. LIBURDY and T. WANG	2137	Buoyancy effects on laminar impinging jets
W. D. BENNON and F. P. INCROPERA	2147	Numerical simulation of binary solidification in a vertical channel with thermal and solutal mixed convection
K. OKUYAMA, Y. KOZAWA, A. INOUE and S. AOKI	2161	Transient boiling heat transfer characteristics of R113 at large stepwise power generation
V. IANNELLO, K. Y. SUH and N. E. TODREAS	2175	Mixed convection friction factors and Nusselt numbers in vertical annular and subchannel geometries

November

S. V. Patankar, E. R. G. Eckert, J. P. Hartnett and W. J. Minkowycz	i	Professor D. Brian Spalding on the occasion of his 65th birthday and retirement from Imperial College
F. Ogino	2191	In Memoriam—Professor Tokuro Mizushina
T. Mizushina	2193	Analogy between fluid friction and heat transfer in annuli
E. M. Sparrow and R. Ruiz	2197	Experiments on natural convection in divergent vertical channels and correlation of divergent, convergent, and parallel-channel Nusselt numbers
N. M. Tsirel'man	2207	Variational solution of the problem of unsteady-state convective heat transfer in the channel
K. Ichimiya, N. Akino, T. Kunugi and K. Mitsushiro	2215	Fundamental study of heat transfer and flow situation around a spacer (in the case of a cylindrical rod as a spacer)
T. Skiepko	2227	The effect of matrix longitudinal heat conduction on the temperature fields in the rotary heat exchanger
I. S. Akmandor, J. Szekely and J. S. Haggerty	2239	Heat and momentum transfer in laser induced decomposition of silane jets: theory and experiments
A. Campo and C. Schuler	2251	Heat transfer in laminar flow through circular tubes accounting for two-dimensional wall conduction
L. Zhang, A. Soufiani and J. Taine	2261	Spectral correlated and non-correlated radiative transfer in a finite axisymmetric system containing an absorbing and emitting real gas–particle mixture
A. Bejan	2273	The process of melting by rolling contact
Joo Sik Yoo, Moon-Uhn Kim and Do H. Choi	2285	Convective instability of a fluid layer confined in a vertical annulus heated from below
M. S. El-Genk, S. J. Haynes and S.-H. Kim	2291	Experimental studies of critical heat flux for low flow of water in vertical annuli at near atmospheric pressure
S. Azizi, C. Moyne et A. Degiovanni	2305	Approche expérimentale et théorique de la conductivité thermique des milieux poreux humides—I. Expérimentation
C. Moyne, J.-C. Batsale et A. Degiovanni	2319	Approche expérimentale et théorique de la conductivité thermique des milieux poreux humides—II. Théorie
B. Basu and J. Srinivasan	2331	Numerical study of steady-state laser melting problem

C.-Y. WANG and C.-J. TU 2339 Effects of non-condensable gas on laminar film condensation in a vertical tube

G. LE PALEC 2347 A new correlation for laminar mixed convection over a rotating sphere

G. S. H. LOCK and J. D. KIRCHNER 2357 Performance of an air-filled, open thermosyphon tube with particular reference to wind augmentation

D. S. RILEY 2365 Steady two-dimensional thermal convection in a vertical porous slot with spatially periodic boundary imperfections

D. R. DUGWELL and D. E. OAKLEY 2381 A model of heat transfer in tunnel kilns used for firing refractories

Technical Notes

J. LAVEN 2391 Improved calculation of the steady-state heat conduction from/towards a cylinder in the centre of a slab

J. E. GATICA, H. J. VILJOEN and V. HLAVACEK 2392 Effect of boundary conditions at the lateral walls on the thermal entry lengths of horizontal CVD reactors

A. P. SILVA-FREIRE 2395 An extension of the transpired skin-friction equation to compressible turbulent boundary layers

December

Y. JALURIA, R. L. MAHAJAN, W. J. MINKOWYCZ, V. P. CAREY, J. C. MOLLENDORF, N. LIOR and J. P. HARTNETT 2399 Professor Benjamin Gebhart on his 65th birthday

E. R. G. ECKERT, R. J. GOLDSTEIN, E. PFENDER, W. E. IBELE, S. V. PATANKAR, J. W. RAMSEY, T. W. SIMON, N. A. DECKER, T. H. KUEHN, H. LEE and S. L. GIRSHICK 2401 Heat transfer—a review of 1987 literature

O. G. MARTYNENKO 2489 Heat and mass transfer bibliography—Soviet works

T. HUSSAIN and N. AFZAL 2505 Mixed convection boundary layer flow on a horizontal plate in a uniform stream
